ABSTRACT

The 1973 statistics of Ohio's public libraries are presented in tabular format. Section one presents data alphabetically by county, providing operational, income, and expenditure data, and circulation and collection statistics. The statistics are then reworked in a series of tables ranking the libraries by tax base, income, circulation, volumes added, total collection, total operating expenses, and number of staff. A similar format is used to present the academic library statistics for the state. Rankings in this section are based on school enrollment, total volumes, total expenditures for books and other library materials, total operating expenses, and total expenditures for salaries. (SL)
